Webpage/Content	Lowest Quality Justification	PQ Rating and Explanation
Lowest: Auto-generated car engine code This page is full of supplementary content, links, and large ads. The MC at the top gives information about a specific error code P2570 and a second block of main content in the middle shows more information about P2570. The MC is broken up by large ads and it is difficult to understand due to the poor content quality.	**Untrustworthy, Spammy** ● Inadequate information about the website or content creator for the purpose of the page ● Content created with little to no effort, talent, skill, originality, manual curation, or added value for users	 This page has low quality MC and spammy attributes. The page repeats the error code "P2570" beyond what is helpful for users- a technique known as irrelevant keywords. The small amount of MC is not original to the website. Lists of error codes are available either by purchase or by scraping. An important fact is missing at the top "When you check engine light came on code P2570 the reason should be ." The reason is left out - this should be the most important content on the page! Looking at other pages on the website, it is clear that each page is created automatically by filling in a template from a list of error code information. There appears to be little to no manual editing or checking to make sure the error code content is correctly pulled in, as evident by the missing reason on this page. As with many spammy websites, there is no information about who is responsible for this website and no way to report problems with the page.
